HL GROUP
ELECTRICAL SOLUTIONS

COMPANY PROFILE · 2026

KOSOVO · CROATIA · ALBANIA · MONTENEGRO

Precision at work. Light in every detail.

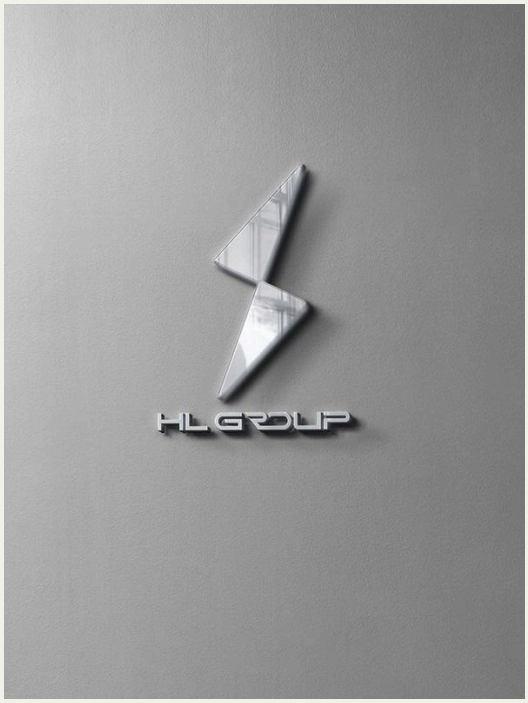

Electrical design, installation and lighting for residential, commercial and public spaces. Based in Kosovo, with project experience across the region.

+383 49 180 707 hlgroupshpk@gmail.com hlgroup-ks.com

Engineering expertise. A personal approach.

Behind every installation is a team. Electrical engineers, technicians and project managers working together to deliver practical, carefully considered solutions.

Our portfolio includes work in Kosovo, Croatia, Albania and Montenegro. Our services bring together electrical design, installations and smart systems, from private homes to industrial and public buildings.

01

Safety in focus

Every installation is planned and carried out with the safety of people and the building at its centre.

02

Precision in execution

Clean, considered work, from the distribution board to the last light point.

03

Solutions tailored to your space

No two spaces are the same. We shape each solution around how the building is used and planned.

The right solution. From concept to installation.

Every space has different needs. We bring design, installation and technology together in one carefully considered solution.

01

Design & measurement

Installation planning and electrical measurements to establish a sound technical foundation.

- Planning of electrical points
- Measurement and inspection of installations
- Coordination with architectural drawings

02

Residential & industrial installations

Electrical systems for homes, business premises and industrial spaces.

- Distribution boards and power distribution
- New builds and refurbishments
- Industrial and public buildings

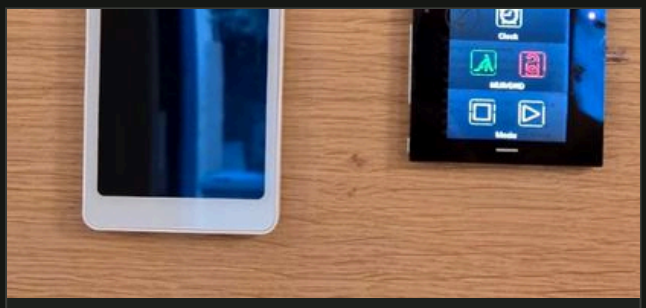

03

Lighting

Indoor and outdoor lighting that gives a space both function and atmosphere.

- Decorative and ambient lighting
- Functional lighting
- Outdoor and facade lighting

04

Smart home & security

Automation, smart lighting and security systems that put you in control.

- Lighting control
- Blind and device automation
- Security and intercom systems

From the first conversation to handover.

A clear process, so you know what happens at every stage of the project.

01

Conversation & assessment

Tell us about the space, the location and what you have in mind. Where needed, we visit the site.

02

Design & quotation

We define the technical solution, materials and timeline. The quotation is based on the actual project requirements.

03

Installation

Our team carries out the work to plan, coordinating with the architect and the construction company.

04

Inspection & handover

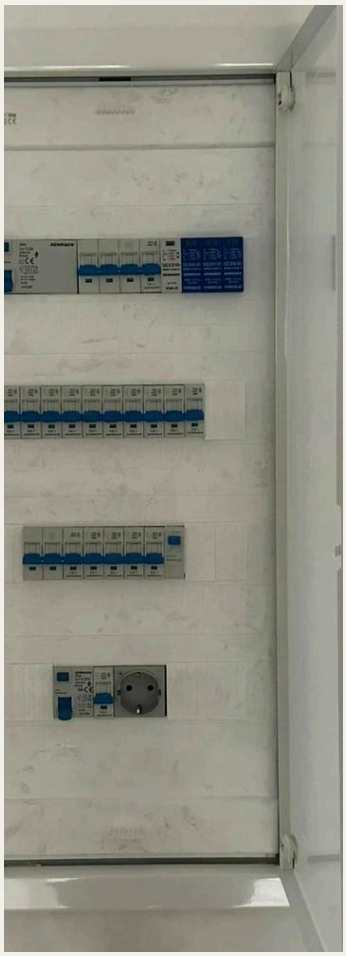

We check the systems before handover and explain how everything works.

FOR A CLEARER QUOTATION

- Location and approximate floor area.
- Room layout or photos, if available.
- New work or renovation; your preferred start date.

You do not need everything to get started. Share what you have; drawings and photos can be sent to hlgroupshpk@gmail.com.

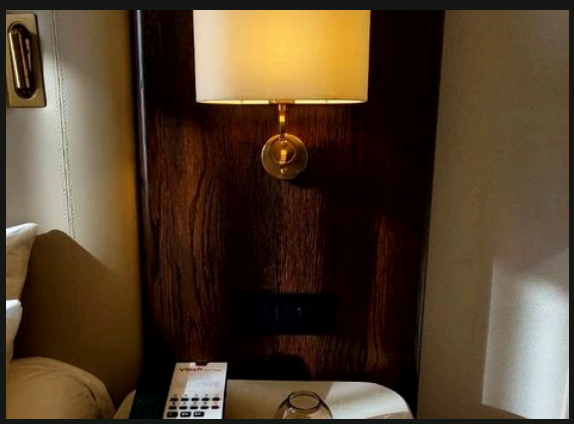

PROJECT IN FOCUS · 01

Hotel Hillton — Prishtina

Interior lighting and installation stages at the Hotel Hillton project.

LOCATION	Prishtina, Kosovo
TYPE	Commercial

PROJECT PARTNERSHIPS

Your partner for electrical works.

01
Architects & design studios
Discuss lighting, electrical points and installation requirements in the context of your design.

02
Construction companies
Define the electrical scope, construction stage and required programme together.

03
Developers & property owners
Tell us how the property will be used and your priorities for installation, refurbishment or lighting.

07 / LET'S MAKE IT HAPPEN

Your project.
Our next step.

Tell us what you have in mind. Let's find the right starting point.
